## EXPERIENCE

**Finance of America**, Horsham, PA

*Assistant Facilities Manager* (January 2017 – February 2020)

Although this position does not directly relate to the position I am searching for, it taught me a lot about working in a conventional work environment. In this position I was responsible for taking inventory of office supplies and ordering supplies that were running low(i.e printer paper, printer ink, bathroom supplies/supplies for the cleaning crew). I was also responsible for keeping the office tidy and making sure the advisors and other workers in the office had what they needed to do their job. Additionally, I would also be responsible for hiring contractors for building repairs/modifications/grounds keeping and snow removal.
